

To add new user in nifi registry:

Here's a **step-by-step guide** to adding a user in **NiFi Registry**:

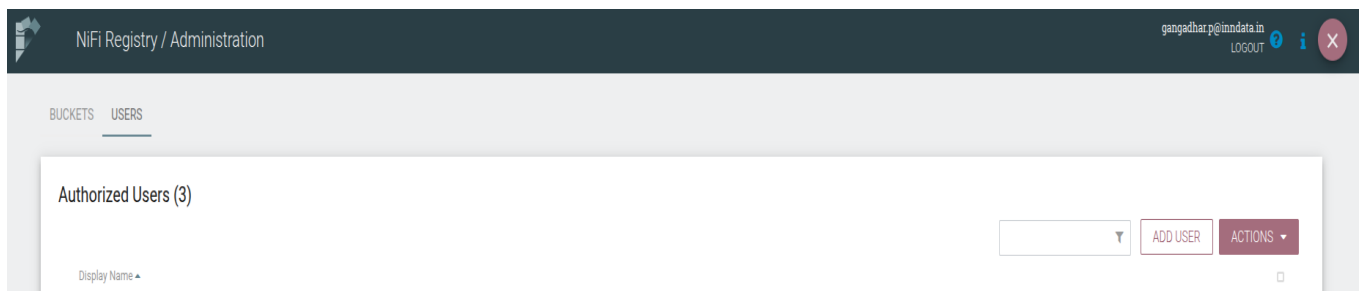

1. Open NiFi Registry UI

- Click on the **Settings (Gear Icon)** in the top-right corner.
- Click on this settings icon.

2. Navigate to User Management

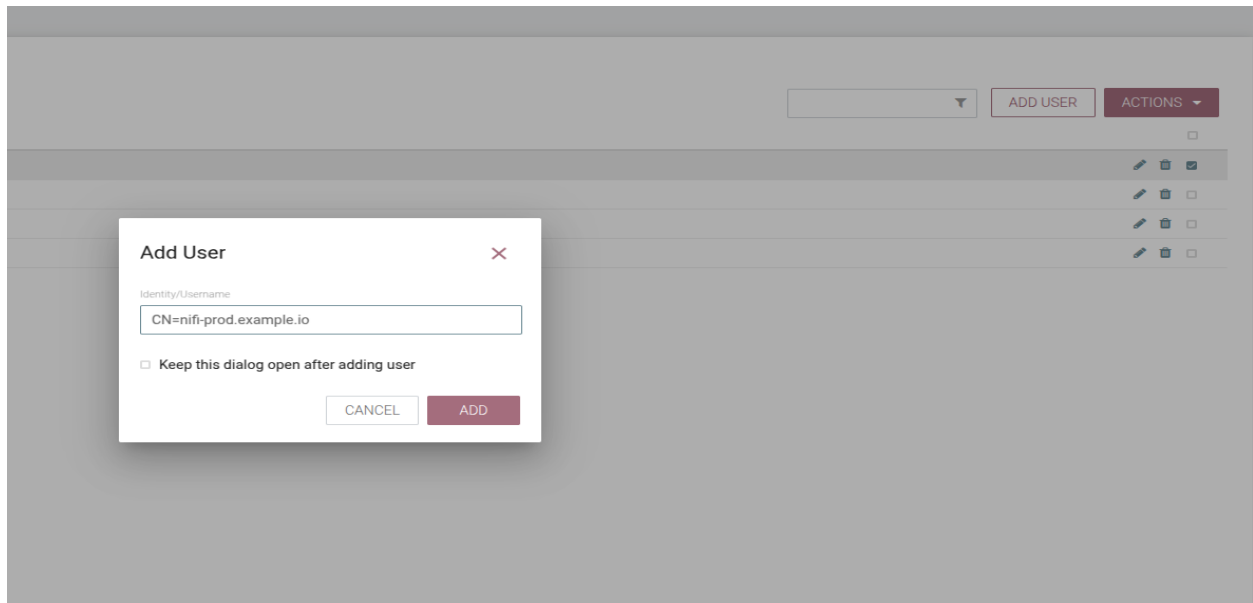

- Select **USERS** from the dropdown menu.
- Then we will have 'ADD USER' option on the right side.

3. Add a New User

- Click on the **"ADD USER"** button. A prompt will appear asking for the **Identity/Username**.

- Enter the **User Identity**:
- Provide either the **NiFi domain name** as the username in the format:
CN=nifi-prod.example.io
- Or enter the **Microsoft Active Directory (AD) mail ID**.
- Click "**ADD**" to complete the user creation process.
- After adding the user, locate the newly created user in the list.

4. Assign Roles & Permissions

- Once the user is added, click on the edit symbol on their name to **edit permissions**.
- Select all **special privileges** for the user.
- Assign appropriate roles if we want for privileges:
 - **Read** → Allows viewing registry contents.
 - **Write** → Allows modifying registry contents.
 - **Delete** → Allows deleting versioned flows.

5. Save & Apply Changes

- Click **Save** to finalize user addition.
- The user should now appear in the **Users List**.
