

Stop Processors and Clear Queues in Apache NiFi

Stopping Processors

Steps:

1. Locate the processor you want to stop.
2. Select the processor by clicking on them.
3. Right-click on the selected processor and choose Stop.

Clearing / Emptying a Queue (Connection)

Steps:

1. Right click on the connection line (queue) between two processors.
2. A dialog will appear showing different options:
3. Click on Empty queue option.
4. Confirm the prompt to complete the operation.

Note: Ensure the related processors are stopped before attempting to empty the queue.
